The ultimate challenge is to make your mind calm and the ultimate solution is meditation. In today's age every second person recommends meditation to the first! And for a student, there cannot be a more powerful technique to improve long term performance in studies and other activities.

Calm mind, better retention, better health, focus and concentration are the obvious benefits. You will realise the benefits, as your practice includes a general sense of well being and happiness and spiritual growth. The 'mood' problem can be taken care of by this way - 'meditation'.

There are many types of meditation. The simplest is of course, focussing on breathing. Since your breath is always with you, it can be done anytime, any place. But the best is to settle down in a cool place that has dim light and is relatively quiet. You must focus all your attention on your breathing. Observe your breath as it comes in and goes out. You will see that your mind will tend to wander a lot, but soon you will be able to bring it back on breathing.

Don't obstruct thoughts, let them go off. All you need to do is to keep your focus on breathing. When you try this initially, you will see how difficult it is to do! But soon, you will gain mastery over it and who knows you might end up as a spiritual Guru !
